_____

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form. Thanks so much!

- - - - This template is ready to work on your site without using any CMS. - - - -

List of template pages:

01 - index.html
02 - blog.html
03 - blog-page.html
04 - 404-page.html

===

Contents:

1. HTML Structure
2. CSS Structure
3. JavaScript.
4. Image Placeholders
5. Sources and Credits
6. API Usage
7. Any additional unique Features & Settings
       7.1. Video container
       7.2. Animated number
       7.3. Owl Slider
       7.4. Flipclock

===

1. HTML Structure

This HTML template used adaptive layout of Bootstrap 3.
4+ Columns

All major sections signed his name, like this:

<!-- Navigation -->

If you have no experience in using HTML, try not to change anything except the text and media content. (Headings, the text displayed on the page, links, images, videos.)
Changing links and media files should always verify the accuracy of the location of these files.

2. CSS Structure

I use one main stylesheet - **style.css**, and a few extra because many browser interpret the default behavior of html elements differently.

style.css file also includes content that you could to quickly navigate

It looks like this:

/*

       Movie Me Main Stylesheet

       - - - - - Contents - - - - -

       01 - Basic Settings CSS
       02 - Navigation
       03 - Owl Slider Controls Reset CSS
       04 - Intro Section
       05 - About Section
       06 - About Sub Section
       07 - Features Section
       08 - Movie-Player Section
       09 - Actors Section
       10 - Advantages Section
       11 - Gallery Section
       12 - Reviews Section
       13 - Blog Section

*/

Also style.css - the main file to change the appearance of the template. To have all of your actions have been applied styles write your code (if necessary) in this section:
/* 18 - Your CSS Code */, after that comment, that is at the end of the CSS file.

3. JavaScript

All you need from Java Script like user is stored in main.js file. You can change the speed slider and more. As well as in the CSS file content present here.

Example:

/*

    Movie Me Main Java Script

    - - - - - Contents - - - - -

10 - Movie Player Dumpers
        11 - Popup Windows
        12 - Waypoints (Parallax)

        - - - - - - - - - - - - -

*/

All data about authors and license for the JavaScript files that I use in my template are stored in the beginning of the JavaScript.

About the Java Script settings, see below.

4. Image Placeholders

All images are for preview purpose only and not included in the download file.
5. Sources and Credits

Java Script
bootstrap.min.js - Twitter, Inc. - http://getbootstrap.com
jquery.min.js - jQuery Foundation - http://jquery.com/download/
jquery.easing.min.js - Robert Penner - http://gsgd.co.uk/sandbox/jquery/easing/
owl.carousel.js - Bartosz Wojciechowski - http://www.owlgraphic.com/owlcarousel/
flipclock.js - Dean Edwards - http://flipclockjs.com/
jquery.appear.js - Alexander Brovikov (2012) - https://github.com/bas2k/jquery.appear/
jquery.animateNumber.js - Alexandr Borisov - https://github.com/aishek/jquery-animateNumber/
jquery.magnific-popup.min.js - Dmitry Semenov -
http://bit.ly/magnific-popup#build=inline+image+ajax+iframe+gallery+retina+imagezoom+fastclick
jquery.mb.YTPlayer.js - Matteo Bicocchi - http://pupunzi.com/
waypoints.min.js - Caleb Troughton - https://github.com/imakewebthings/jquery-waypoints/

Fonts
Open Sans (Google Web Font)- https://www.google.com/fonts/specimen/Open+Sans

Font Awesome - by Font Awesome (include CSS and Font) -
http://fortawesome.github.io/Font-Awesome/
Journal Font - by Fontsquirrel - http://www.fontsquirrel.com/fonts/Journal/

Video
Dark Version - https://www.youtube.com/watch?v=hIR8Ar-Z4hw

Light Version - https://www.youtube.com/watch?v=Z6Dgdp4fxQw

6. API Usage

jquery.mb.YTPlayer.js use Google API

7. Any additional unique features & settings of pages that need an overview

7.1. Video container
Go to **main.js** these settings are located after comments **05 - Video container (You Tube)** .
In **07 - Video container (You Tube)** enter the ID from link to video for example:

> **https://www.youtube.com/watch?v=z9RBALOraws**
> is
> videoId: **'z9RBALOraws'**,

7.2. Animated number

To change the animated number go to **main.js**
In paragraph **02 - Animate Number Plugin** change the number to whatever you want in each item.

> $('#counter-1').animateNumber({ number: **1024** }, 2000);
> $('#counter-2').animateNumber({ number: **2360** }, 2000);
> $('#counter-3').animateNumber({ number: **1586** }, 2000);

1024, 2360, 1586 - this is your numers
2000, 2000, 2000 - delay of loading

7.3. Owl Slider

To initialize your slider read the instructions of this script here
Mow all sliders with own CSS Code and configured properly.

7.4. Flipclock

Item **09 - Flipclock** in **main.js** file. Set some date in the future.
In this case "futureDate = new Date("May 1, 2015 00:00:00")"

If you want to display other date, read the instructions of the script here

==

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
